Is My Windows Device Yale-Managed?

NGN ENA wired

Knowing whether or not your device is managed by Yale will determine how you authenticate on Yale's secure network.

To find out:

- Log in to your computer
- Click the start icon in the bottom left corner of the screen
- Type 'About' into the search bar
- Click 'About your PC' & check 'Device Name.' *If your device name starts with MW or a prefix such as SEAS, MED, FAC, ADM, etc., it is Yale-managed.*

IDENTIFY YOUR DEVICE

Device name MWC123DEF

SELF-MANAGED DEVICE

secure W2

You need to install **SecureW2** to continue connecting to the wired Yale network seamlessly.

Add to Cart

Navigate to the Yale Software Library and search "SecureW2". Click "Add to Cart", then click the cart icon at the top of the screen.

Download

Click 'Checkout', then 'Continue', then 'Download', and choose your operating system (Windows)

Double click the downloaded file to install it. Enter your Net ID & Password when prompted

A pop-up message will indicate a successful connection. If you see "Network not in Range" click 'Continue"

YALE-MANAGED DEVICE

If your managed device has internet-only access when ENA Wired launches, **CALL the ITS Help Desk** at **203-432-9000** and mention ENA Wired for immediate assistance

Still need help?

Call the ITS Help Desk at **203-432-9000** and mention **ENA Wired** for prompt assistance in identifying your device or authenticating on Yale's secure network
