

NGN Migration Expectations Guide

NGN Migration Phases & Expected Outages

NGN migration will happen in three phases: wired, wireless, and facilities migration:

1. During wired migration, NGN technicians will be working in network closets moving wired connections; **all networks will experience an outage** during the wired migration window. Please consult the [Community Experience Matrix](#) for additional information.

2. During wireless migration, NGN wireless technicians will be walking the building, upgrading all wireless access points to support enhanced WiFi; there will be a **rolling wireless outage of less than 15 minutes** per area as access points are upgraded.

3. During facilities migration, building engineers will be upgrading building management devices to NGN and only specific facilities devices will be impacted; there will be **no wired or wireless outages** during the facilities migration window.
